TWO WAY LOUDSPEAKER CLOSED BOX

novaudio[®]

The shape of Sound handmade in Italy

The 3/4"-19 mm **Novaudio**[®] **Tweeter** is instantly identifiable for its fatigue-free realistic reproduction. The EVA-coated front surface is designed for exceptional dispersion even off-axis. The special dampening treatment of the silk dome has resulted in an exceptional linearity of +/- 2 dB from 2000 to 18,000 Hz.

The 8"-210 mm **Novaudio**[®] **Woofers** has an aluminium/magnesium basket. The suspension in new polyethylene foam not only results in a highly natural sound in the mid frequencies, but also guarantees impressively fast articulation, allowing details to flow out harmoniously without listening fatigue.

The **Novaudio**[®] **Crossover** is point-to-point welded using audiophile-grade components elastomerically bonded to a substrate, dampening residual micro-phonic vibrations.

Technical detail

Tweeter: 3/4"-19mm Treated silk.

Woofers: 8"-210mm Coated paper with aluminium/magnesium basket and polyethylene foam suspension.

Crossover: Point-to-point welding with selected components of the highest quality.

Nominal impedance: 8 ohm.

Suggested amplifiers: 10÷100 watt.

Frequency response:

37÷20.000Hz +/-3dB

33÷21.000Hz +/-6dB

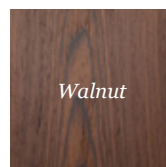

Selected pair with 1,5 dB difference & unique serial number.

Dimensions:

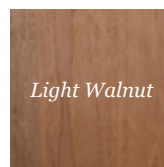

L 32cm, P 20cm, H 47cm.

Available finishes

Others on request.

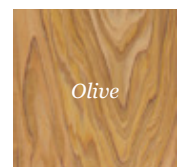

Walnut

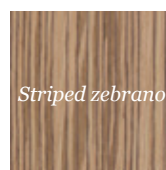

Light Walnut

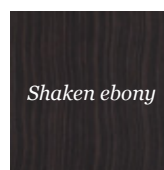

Wengé

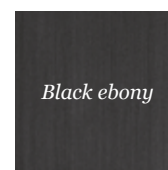

Olive

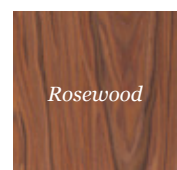

Striped zebrano

Shaken ebony

Black ebony

Rosewood
